EXPERIENCE

Self-employed with Laravel

- A website designed for efficient data storage solutions tailored for customers.
  https://github.com/majdabushalbak/simple_storage

- A company website for a new startup that showcases its product offerings and sales. It includes an admin page for efficient product management and operations.
  https://github.com/majdabushalbak/company_website

- A gym website that offers lessons in muscle training and health care. It features subscription options for users, allowing them to access exclusive content and personalized training plans.
  For payment processing, I utilized the Lahza API, which provides a seamless and secure online payment experience with the bank of Palestine.
